Refunds

Refunds are available in the case of Ski accidents/illnesses which have been confirmed with a doctor's note and with immediate surrender of the ski pass at the cable car ticket offices. Days of use are the days which have elapsed between the date of issue and date of surrender of the ski pass at the ticket office. If the ski pass is surrendered by 9.30am, this day will not be counted. What counts is the date the ski pass is surrendered, not the date of the accident. A medical note from a local doctor or a hospital is absolutely necessary and can be submitted at a later time. Bad weather, the risk of avalanches, unforeseen departure, epidemic or pandemic events, guest quarantine, restriction or interruption of operations, closure of ski runs and individual facilities, etc. do not entitle the guest to a refund or extension. Please check the current service and weather conditions before you buy your ski pass. At the beginning and end of the season, owing to circumstances, there may be restrictions to the pistes and facilities available.

NEWS.

The new 10-passenger Komperdell monocable cableway. Seilbahn Komperdell GmbH has invested over 60 million EUR in the new Komperdellbahn cable car, which will provide a new level of travel comfort from December 2023!

Everything is new! The cable car route now leads up to Komperdell along the Mittelabfahrt slope via the new mid station. The new mid station offers several advantages: Firstly, traffic is relieved in the Gampen area, as ski school groups can comfortably ski down the Mittelabfahrt slope to the mid station. Secondly, the last section of the descent can be bypassed with a downhill run from the station to the valley. Thanks to an additional (winter) hiking trail, the Leithe Wirt restaurant is only a few minutes' walk from the station. The new bottom station was built a little further north into the slope, making the access area to the Sunliner cable car as well as the front area between the Komperdell- and Alpkopfbahn cable cars much wider and more spacious. The "Check-In" ski storage at the bottom station was extensively enlarged and equipped with approx. 5,000 parking spaces. The top station has been integrated into the existing building at Komperdell, and all levels are now connected via escalators and lifts. The new ski school area in the top station is at ground level, offering direct access to the Kinderschneealm snow park. The 10-seater gondolas have a transport capacity of 3,000 people per hour and boast a modern design and ample interior space. Skis and snowboards can now be taken into the gondola. To make it easy for children to get on and off, the lift travels very slowly in the stations; these areas are of course suitable for prams and are barrier-free.

SLOPE IMPROVEMENTS

Frommesabfahrt slope:

On the popular Frommesabfahrt slope, the slope itself has been significantly widened in the lower area, ensuring greater safety and even more skiing enjoyment.

Mittelabfahrt slope Serfaus:

The last section of the Mittelabfahrt slope (below the new Komperdellbahn mid station) has been completely redesigned, allowing almost all skiers to ski down to the Serfaus bottom station without any problems.

Viewing platform at the Schönjochbahn top station:

You can reach the new viewing platform directly from the exit of the Schönjochbahn cable car barrier-free. From here you have a unique view of the surrounding mountains and peaks.
